

KEY BENEFITS

- ✓ The most POWERFUL filter of its size on the market
- ✓ Efficient self-cleaning of filter bags
- ✓ Modular by design
- ✓ Quiet operation & high efficiency
- ✓ Over 50,000 systems installed worldwide

AST - SUCTION TABLE

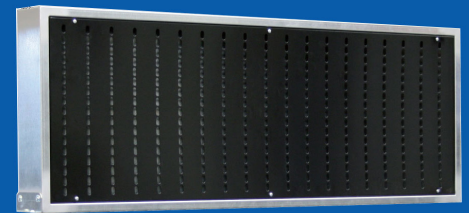

AIRTIGHT SUCTION TABLE - AST SERIES WITH PULSE JET TECHNOLOGY

STANDARD AST SIZES: 1500PJ , 2000PJ, 2500PJ

The AST suction bench is used for the extraction of fumes and dust from finishing operations, including suction of wood & poly sanding dust, marble & mineral dust and general applications including engineering industry.

The careful design of the suction slits ensures extraction of smoke and dust particulates before they can be inhaled by the operator, thus eliminating health risk.

Comes with felt surface as standard. Many optional extras available, including front suction wall.

QUICK FACTS
